Job Description

Our client is a multinational company specializing in Design, Manufacturing, Hardware Platform, and Supply Chain Electronics Manufacturing Services (EMS), currently seeking a motivated Program / Project Manager to join their dynamic and growing organization. You will be responsible for leading large projects and managing design engineers to develop, implement, and evaluate complex designs.

Job Descriptions

- Work with internal and external customers to drive ongoing quality improvement through DFM and New Part Qualification.
- Support CTH quality and Global Supplier Quality Teams qualifying new product and controlling of leading-edge Cable, Connector (Interconnect) for high-speed networking applications.
- Work under minimum supervision. Build internal and external relationships, with emphasis on those that facilitate the achievement of job/role accountabilities, such as relationships with key suppliers, customers and internal service.

- Assess the alignment of production, support and engineering processes and practices with Celestica's Values, corporate strategies and Celestica's specific business assessment. Works as part of a team to drive supplier quality improvement and supplier technical development.
- Regular audits for process compliance and evaluate technical capability.
- Rapid reaction on-site for delivered quality issues and problem management until the issue is resolved, driving failure analysis and corrective action through an 8D response.
- Work with the Commodity Management team to develop the interconnect supply base and evaluate and qualify new suppliers and complex technology parts.

Job Requirements

- Min 8-10 years of relevant experience and a Bachelor's degree in a relevant field OR equivalent combination of education and work experience
- In depth knowledge of the cable and connector (Interconnect) manufacturing process is essential including knowledge of high speed cable connectivity and fibre optic technology
- Advanced knowledge in cable and connector engineering, and quality processes
- Excellent interpersonal skills and written and spoken English
- Knowledge of Automotive quality tools - APQP, FMEA, PPAP etc.
- Audit experience or audit certifications is an advantage.
