Job Description

Company Overview

A company in the information technology field is hiring for a Security Engineer / Security Specialist position. This organization operates across multiple regions and is focused on building a cohesive and forward-looking IT environment that supports business growth. The role offers the opportunity to influence enterprise-wide strategy and collaborate with international teams, contributing to long-term transformation at a global scale.

Job Description

- Design and implement security measures across access control, identity management, endpoints, and networks in alignment with global objectives
- Lead or contribute to the deployment of security solutions such as identity management, endpoint protection, and data protection tools while coordinating with internal teams and external partners

- Manage and continuously improve security operations, including tool configuration, monitoring, and enhancement initiatives
- Support responses to incidents, vulnerabilities, and risks, ensuring timely and effective mitigation
- Review system and operational changes from a security perspective and ensure alignment with policies and guidelines
- Maintain visibility of the overall security landscape across people, processes, and systems, identifying gaps and driving improvements

Qualifications

- Professional 7 years of experience in IT or information security
- Hands-on experience implementing security solutions in areas such as identity and access management, endpoint security, or network and cloud security
- Ability to understand security from a holistic perspective rather than isolated components
- Strong communication skills to explain technical concepts and coordinate effectively with stakeholders
- Proficiency in English and Japanese for both written and verbal communication
- Experience working in global or multi-location environments is advantageous
- Knowledge of security policies, governance, and operational processes is preferred
- Familiarity with cloud-based environments is beneficial
- Relevant security certifications are a plus
- Proactive mindset with the ability to identify issues and propose improvements independently
- Collaborative approach to working with both local and international teams
