#### Job Description

This role focuses on delivering high-quality functional and automation testing for advanced consumer technologies, including analyzing defects, creating automation scripts, and ensuring product reliability. It offers the chance to work in a fast-paced, innovative environment at a leading global tech company, contributing to products used worldwide.

#### Client Details

The employer is a large organization operating within the Technology & Telecoms sector. They are committed to innovation and excellence, offering cutting-edge solutions and services to meet the evolving needs of their clients.

#### Description

- Perform functional testing, defect logging, tracking, and reporting to ensure product quality.
- Develop, maintain, and troubleshoot automation scripts while triaging and resolving automation failures.
- Analyze test results to identify patterns, investigate issues, and produce clear, detailed reports.
- Collaborate in a fast-paced environment, leveraging strong communication skills, Python/XCTest expertise, and

understanding of AI tools and prompt writing.

### Job Offer

- Opportunity to work in a dynamic and innovative environment.
- Join a well known global company
