Job Description

This role focuses on ensuring the quality and reliability of mobile SDKs, web SDKs, and large-scale analytics services used by millions of users. You will drive test strategy, automation, and quality standards within a highly technical, data-driven environment.

Client Details

Our client is a **large multinational technology group** operating one of the most advanced consumer data and analytics platforms in Japan. Their systems process billions of events in real time and support a wide range of digital services with a massive active user base.

Description

- Perform comprehensive **manual and automated testing** for Mobile SDKs, Web SDKs, and user access log analytics services, including UI and API testing
- Design **test strategies, test plans, and detailed test cases** aligned with business and technical requirements

- Execute test cases, document results, and proactively propose quality improvements and standards
- Identify, track, and manage defects using **JIRA**, ensuring timely resolution through the development lifecycle
- Monitor QA metrics such as defect density and open defect trends to drive continuous improvement
- Drive automation initiatives, including **shift-left and shift-right testing**, and integrate automated testing into release cycles

Job Offer

- Long-term contract opportunity with stable renewals
- Exposure to **high-scale, high-impact data platforms**
- Collaborative, international engineering environment
- Standard business hours with weekends and public holidays off
- Hybrid-friendly work style based in the Tokyo metropolitan area

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Hikari Takamura on +813 6832 8903.

Required Skills

- 5+ years of experience in **Software Quality Assurance**, with strong exposure to **Mobile SDK and Web SDK testing**
 - Experience developing **test strategies** for B2C and B2B products with large user bases
 - Hands-on experience working in **Agile / Scrum** development environments
 - Strong SQL skills and proficiency in **Python, Java, and/or JavaScript**
 - Practical experience with **automation frameworks** such as Selenium, Appium, or similar tools
-
