#### Job Description

This role involves developing and maintaining scalable Python backend systems that support large-volume, consumer-facing energy services. It requires strong bilingual Japanese-English communication skills and at least six years of Python experience to collaborate effectively in a cross-cultural engineering environment.

#### Client Details

This company is a large organization in the Technology & Telecoms sector, known for its technological advancements and commitment to developing cutting-edge solutions. The organization operates on a global scale and provides a collaborative and forward-thinking work environment.

#### Description

- Develop, maintain, and optimize scalable Python backend services supporting large-volume energy-related platforms.
- Design and implement APIs, data-processing pipelines, and system integrations to enhance service performance and reliability.

- Collaborate with cross-functional, bilingual (Japanese/English) teams to deliver features, resolve issues, and improve system architecture.
- Perform code reviews, troubleshoot complex problems, and contribute to engineering best practices and long-term technical planning.

#### **Job Offer**

- Opportunity to work in a globally recognized Technology & Telecoms organization.
- Engaging projects in a collaborative and innovative environment.
