Mid Career

**Minimum English Level**

Business Level (Amount Used: English Only)

**Minimum Japanese Level**

None

**Minimum Education Level**

High-School

**Visa Status**

Permission to work in Japan required

### Job Description

**What You'll Do**

- Own, maintain, and evolve Kubernetes clusters and workloads on GCP.
- Build and improve CI/CD pipelines to enable fast, safe, and auditable deployments.
- Implement and maintain observability tooling — logging, metrics, alerting, on-call runbooks.
- Enforce security best practices across the platform, given our sensitive communication data.
- Collaborate with backend and mobile engineers to support their deployment needs.
- Define infrastructure-as-code standards and ensure everything is auditable and reproducible.

**Tech Stack**

- Infra: Kubernetes (GKE), GCP, Terraform
- Backend: Go, TypeScript
- CI/CD: GitHub Actions or equivalent

---

**Required Skills****Must-have:**

- 3+ years of infrastructure, DevOps, or SRE experience in a production environment.
- Deep hands-on Kubernetes experience — cluster management, networking, RBAC, Helm, GitOps.
- Strong GCP knowledge: GKE, Cloud Run, Cloud SQL, Pub/Sub, IAM, Secret Manager.
- Experience with infrastructure-as-code tooling (Terraform, Pulumi, or similar).
- Strong understanding of security and privacy fundamentals — we handle sensitive communication data.
- Clear communicator in English.

**Preferred:**

- Experience with multi-tenant or multi-environment Kubernetes setups.
- Background in consumer or BtoG (government/public sector) product infrastructure.
- Familiarity with ISO 27001 or SOC 2 compliance environments.

---
