Job Description

【求人No NJB2306337】
We are seeking a highly skilled and dynamic full stack engineer with extensive technical expertise and proven team leadership experience to take ownership of technical responsibilities throughout the entire product development lifecycle. The ideal candidate will excel at solving diverse technical and business challenges while providing mentorship and guidance to other engineers on the team.

This role provides an exciting opportunity to advance your tech career by contributing to the development of multiple products within Rakuten's extensive ecosystem and cutting edge technology landscape.

Required Skills

■Mandatory Qualifications:
A minimum of 7+ years of proven hands on experience as a Software Engineer in software development demonstrating strong analytical and problem solving skills
Extensive hands on experience in designing and developing large scale web applications using technologies such as Java Spring MariaDB MongoDB Kafka and React.js
Comprehensive hands on experience with Agile development methodologies and Scrum practices
Proactive self driven and highly motivated individual
Excellent communication skills capable of effectively collaborating with both technical and non technical stakeholders
A team player with a positive and approachable attitude
Strong get things done mindset paired with a sense of ownership and accountability
