Job Description

Our client is a **global IT solutions provider** working with **large enterprise customers in Japan** .

Their systems support **business-critical operations** used by millions of users every day. They deliver **long-term, complex**

software-related projects involving many systems, vendors, and international teams. Projects follow **clear governance, quality standards, and structured processes**.

About the Role

Our client is looking for an **experienced Project Manager** to manage **multiple enterprise IT projects**. The role focuses on **end-to-end project ownership**, including delivery, cost control, quality management, and close client communication. You will work closely with customers, sales, finance, vendors, and internal delivery teams.

Main Responsibilities

- Manage **multiple software-related projects** and oversee progress, schedules, risks, and resources
- Lead projects **end-to-end**, from proposal and contract phase through delivery, maintenance, and operations
- Manage **project budgets, revenues, and costs**, and report status to clients and management
- Establish and maintain **quality standards** for project deliverables and ensure compliance
- Lead or support **proposal preparation, quotations, and contract coordination** with sales teams
- Act as a key **client-facing point of contact**, managing expectations and escalations
- Coordinate internal teams and **external vendors** to ensure on-time, high-quality delivery

Why join our client

- They are trusted by **Japan's leading telecom and media companies**
- Works on **large, long-term software projects** with real impact
- Strong focus on **cloud, AI, and 5G transformation**
- Stable environment with **multi-year projects and career growth**
- Global company with **international teams and English working environment**
- **Competitive salary**
- Highly **professional team**

Required Skills

- **10+ years of experience** in **software-related project management**
- Proven experience managing **large systems and multiple parallel projects**
- Strong experience with **budget control, cost management, and financial reporting**
- Experience with **deliverable quality control** and structured review processes
- Experience in **proposal activities and contract-related work**
- Strong **stakeholder, vendor, and client management** skills
- Familiarity with project management methodologies (PMBOK, PRINCE2, or similar)
- High analytical, problem-solving, and decision-making skills
- **Fluent English** (spoken and written)
- **Native-level Japanese** communication skills (spoken and written)

Nice to Have

- Experience in **large enterprise or IT service companies**
- Experience working with **vendors and offshore teams**
- Comfortable working in **English-led project environments**
- Experience in **governance-heavy projects**

Company Description
