Job Description

Our client is a **global technology leader** delivering **mission-critical IT solutions** to large enterprise customers in Japan. Their platforms support **millions of users daily** and run **complex, business-critical operations**.

The company has successfully reinvented itself across every major tech shift and is now driving its next phase through a **strategic GenAI & Data division**. They deliver **production-grade, LLM-driven systems** already deployed in **live enterprise environments**. Following a major cloud transformation, the business is strongly focused on **AI, cloud, and high-**

value platforms.

We are hiring an experienced **Service Delivery Manager** to lead large-scale, enterprise-wide IT programs delivered from the client location in Tokyo. This role offers the combination many senior leaders look for: enterprise scale, executive visibility, global team leadership, and true strategic ownership.

Main Responsibilities

- Lead complex, multi-project enterprise IT programs end-to-end, from strategy definition through execution and go-live
- Define program scope, governance model, integrated master plans, and roadmaps
- Manage global onshore - offshore delivery teams and ensure structured collaboration across regions
- Lead C-level Steering Committee meetings and provide executive reporting on progress, risks, scope, and financials
- Act as the primary escalation point for major program challenges and drive resolution
- Build strong, trust-based relationships with C-suite and senior business stakeholders
- Manage multiple parallel projects under a unified governance structure
- Establish RAID logs, KPIs, dashboards, and structured reporting cadence
- Oversee technical integration, testing readiness, cutover planning, and deployment
- Own program budgets, forecasts, vendor governance, contract compliance, and financial performance
- Lead and mentor program managers, project managers, architects, and engineering leads

Why join our client

- Lead high-impact enterprise transformation programs
- Direct exposure to C-level executives and senior leadership
- Build and lead global delivery organizations
- Work at the forefront of AI, cloud, and modernization initiatives
- Stable, well-established global company with long-term strategic programs
- Competitive executive-level compensation

Required Skills**Requirements**

- 15+ years of IT delivery experience
- Proven ownership of 2-3 large-scale enterprise IT program deliveries
- Strong experience managing global onshore-offshore delivery models
- Demonstrated C-level engagement and Steering Committee leadership
- Solid multi-project governance experience (RAID, risk, issue, change management)
- Strong people leadership experience (managing managers and senior leads)
- Experience with enterprise system integration, digital transformation, and cloud environments
- Skilled in Waterfall, Agile, and Hybrid delivery models
- Experience managing program budgets and vendor performance
- Fluent English (spoken and written)
- Native-level Japanese communication skills (spoken and written)

Nice to Have

- Certifications such as PMP, PgMP, SAFe, or ITIL
- Experience in telecom or other large enterprise environments
- Familiarity with MS Project, Jira, ADO, Confluence, and Power BI
