Looking to build data systems that power AI at scale?

We're hiring a Senior Data Engineer to work on cutting-edge projects across AI-driven content, SaaS analytics, and next-generation digital platforms.

Why this role?

- Work on real AI products, not just reporting
- Build scalable data platforms from the ground up
- High-impact role with ownership and autonomy
- Exposure to AI, Web3, and emerging technologies

What you'll do

- Design and scale data infrastructure and pipelines
- Build and operate data platforms for SaaS analytics
- Support generative AI use cases
- Own systems end-to-end and influence product direction
- Mentor engineers and contribute to team growth

Required Skills

What you bring

- 5+ years in Data Engineering
- Strong Python and cloud experience (AWS or similar)
- Experience with Terraform, Docker, and Snowflake
- Solid understanding of data architecture and analytics
- Ability to take ownership and lead projects

Company Description
