#### Job Description

We are seeking a highly skilled Senior Java professional to join a leading financial services company in Tokyo. The ideal candidate will leverage their technical expertise to deliver innovative solutions within the technology department.

#### Client Details

The hiring company is a large organization within the financial services industry, known for its strong presence in the market and commitment to excellence. They focus on delivering top-tier financial solutions and fostering a culture of innovation.

#### Description

- Design, develop, and implement Java-based applications to meet business requirements.
- Collaborate with cross-functional teams to analyze, design, and deliver technical solutions.
- Optimize and maintain existing Java applications for performance and scalability.
- Ensure code quality through unit testing and peer reviews.
- Troubleshoot and resolve technical issues in a timely manner.

#### Job Offer

- Competitive monthly salary
- Opportunity to work in a leading financial services organization in Tokyo.
- Engaging and collaborative work environment within the technology department.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

---

## Required Skills

A successful Senior Java professional should have:

- Strong proficiency in Java programming and related frameworks.
  - Proven experience in developing and maintaining scalable applications.
  - Knowledge of software development best practices, including testing and version control.
  - Familiarity with financial services industry systems and processes.
  - Strong problem-solving skills and attention to detail.
-
