Job Description

Job Title: Mainframe Modernization Business Systems Analyst (BSA)

About the Role

Join a global leader in technology transformation where you'll have the opportunity to shape your career, collaborate with talented professionals, and help organizations unlock the full value of technology. This role focuses on mainframe modernization initiatives, driving innovation while maintaining critical legacy systems.

Key Responsibilities

- Analyze, support, and enhance mainframe (MF) applications and systems
- Collaborate with stakeholders to define business and technical requirements
- Support modernization efforts, including integration with cloud-based environments

- Work with development and operations teams to ensure system reliability and performance
- Manage job scheduling, JCL processes, and production support activities
- Ensure smooth data handling and database interactions (RDB knowledge preferred)

Why Join Us

- Work on cutting-edge modernization projects
- Collaborate in a diverse, global environment
- Grow your career with continuous learning opportunities
- Contribute to impactful, large-scale digital transformations

Apply Now

Be part of a team shaping the future of enterprise technology. Apply today to take the next step in your career.

Required Skills

Required Qualifications

- 10+ years of experience in mainframe application development and/or maintenance
- Strong experience with **COBOL** and/or **Assembler programming**
- Hands-on knowledge of **IBM, Fujitsu, or Hitachi mainframe platforms** (middleware and utilities)
- Experience with **JCL**, job scheduling, and job management
- Knowledge of **SAM/VSAM files** and **RDB databases**
- Business-level proficiency in **Japanese (N2+)** and English

Preferred Qualifications

- Experience with **Java development in cloud environments**
 - Exposure to modernization or migration projects
