Job Description

This role sits at the core of data- and intelligence-driven business growth.

You will bridge business and technology to lead complex projects to success.

Client Details

This organisation operates a cross-functional data and intelligence function that integrates master data and external data to enable data-driven decision-making across multiple business domains.

By combining advanced analytics and technology, the team delivers high-value insights that support strategic planning and business growth.

Description

- Lead requirement definition and project execution for high-complexity initiatives with a strong focus on ROI
- Structure business challenges and define business, functional, and non-functional requirements
- Support data-driven decision-making, proposal development, and operational efficiency improvements
- Strengthen business competitiveness through the strategic collection and analysis of competitor data
- Generate knowledge and insights by leveraging AI and catalog data
- Act as a key liaison between business stakeholders and development teams, ensuring smooth communication
- Provide guidance, reviews, and constructive feedback to project and development teams to maximise quality and outcomes

Job Offer

- Exposure to advanced data and AI-driven initiatives
- High level of ownership and influence on business-impacting projects
- Collaboration with highly skilled, multidisciplinary professionals
- Strong opportunities for professional growth based on performance and expertise
- Work in a supportive and innovative environment in Tokyo.
- Working hours: 9:00 AM - 5:30 PM
- Remote work available
- Free meals at the in-house cafeteria

If you are passionate about technology and thrive in the retail sector, we encourage you to apply for the Program Manager role in Tokyo today!

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Krisztina Szokolai on +81366276101.

Required Skills

- 5+ years of experience in product management, programme management, consulting, or a related field
- Proven experience leading complex projects from requirements definition through delivery
- Strong analytical capabilities, including data interpretation and/or competitive analysis
- Leadership-oriented project management skills with the ability to deeply understand client needs
- Native-level Japanese and strong professional communication and documentation skills in English
- Bachelor's degree in a relevant field (e.g. Business, Marketing, Computer Science, Engineering) preferred
