Job Description

COMPANY OVERVIEW

Our client is a prominent global IT service provider that excels in custom software design, IT consultancy, and infrastructure management. They deliver high-performance, large-scale systems like API Gateways and message queues, ensuring smooth global operations and enhanced system reliability.

We are currently looking for a Solution Architect. Hands-on technical lead responsible for delivering Azure-based digital solutions while acting as Scrum Master and primary client-facing technical partner. The role spans solution architecture, development, agile delivery, and stakeholder management.

JOB RESPONSIBILITIES

- Lead end-to-end delivery of Azure-based automation, integration, and web application projects
- Design and develop AI-driven document processing and enterprise automation solutions
- Act as Scrum Master; manage and mentor offshore and partner developers

- Engage stakeholders to gather requirements and translate them into technical designs
- Ensure delivery quality, security compliance, and governance standards

JOB REQUIREMENTS

- 5+ years software development; 2+ years in a lead or delivery role
- Strong Python and Azure experience (Functions, Static Web Apps, PostgreSQL, Azure AI, AOAI)
- SAP GUI scripting and automation experience
- Agile delivery tools (JIRA, GitHub); Scrum Master certification preferred
- Strong stakeholder communication; willingness to travel to India monthly

Work Location: Singapore
