Job Description

The Global IT DBA team is looking for an experienced Oracle EBS, Database, SOA, and Cloud Administrator to manage and maintain our Oracle environments across on-premises and cloud platforms.

The role involves end-to-end management of Oracle E-Business Suite, Oracle Databases, Service-Oriented Architecture (SOA) components, and cloud infrastructure. The ideal candidate will have strong technical expertise in Oracle technologies and cloud administration, with a proven track record of ensuring system reliability, security, and performance.

Required Skills

Key Responsibilities:

1. Oracle E-Business Suite (EBS) Administration:

- Install, configure, patch, and upgrade Oracle E-Business Suite (R12).
- Manage and monitor EBS modules, concurrent managers, workflows, and custom applications.
- Handle cloning, backup, and recovery operations for EBS environments.
- Manage user access, roles, and responsibilities, ensuring compliance with security standards.
- Troubleshoot and resolve application issues in collaboration with functional and development teams.

2. Oracle Database Administration:

- Administer Oracle Databases (12c, 19c, or later) including installation, configuration, patching, and upgrades.
- Perform database tuning, optimization, and query performance improvements.
- Implement and manage high availability (HA) and disaster recovery (DR) solutions, including Data Guard, RMAN, and GoldenGate. o Monitor database health, security, and performance using tools like Oracle Enterprise Manager (OEM).
- Conduct regular backups, restores, and data migrations as needed.

3. Oracle SOA Administration:

- Install, configure, and manage Oracle SOA Suite, including BPEL, OSB, and other middleware components.
- Deploy, monitor, and troubleshoot SOA composites, web services, and integrations.
- Optimize SOA performance and ensure the reliability and scalability of the integration environment.
- Collaborate with development teams to support SOA-based integrations and resolve middleware issues.

4. Cloud Administration:

- Design, deploy, and manage Oracle Cloud Infrastructure (OCI) and other cloud platforms Job Description: Oracle EBS-DB-Cloud Admin (e.g., AWS, Azure) hosting Oracle workloads.
- Automate cloud resource provisioning and management using tools like Terraform, Ansible, or OCI Resource Manager.
- Optimize cloud resources for performance and cost-efficiency, ensuring alignment with business needs.
- Manage cloud networking, storage, and security configurations, including identity management and access controls.

5. Security and Compliance:

- Implement security best practices for EBS, database, SOA, and cloud environments.
- Ensure systems comply with regulatory standards such as GDPR, PCI-DSS, and SOX.
- Regularly apply security patches and manage vulnerability assessments and remediation.

6. Monitoring, Performance Tuning, and Troubleshooting:

- Monitor system performance and availability, proactively identifying and resolving issues.
- Conduct root cause analysis for incidents and apply corrective measures.
- Fine-tune performance across the EBS, database, SOA, and cloud environments.

7. Backup, Recovery, and Disaster Recovery (DR):

- Develop and maintain comprehensive backup, recovery, and disaster recovery strategies.
- Perform regular DR drills to ensure readiness and minimize downtime.

8. Support and Collaboration:

- Provide L2/L3 support for EBS, database, SOA, and cloud issues, coordinating with Oracle Support when necessary.
- Collaborate with cross-functional teams on system integrations, upgrades, and migrations.
- Document procedures, configurations, and troubleshooting guides for the IT team.

Qualification

1. Education:

- Bachelor's degree in computer science, Information Technology, or a related field (or equivalent work experience).

2. Experience:

- 5+ years of experience administering Oracle E-Business Suite (R12).
- 5+ years of experience as an Oracle Database Administrator.
- 3+ years of experience managing Oracle SOA Suite.
- 3+ years of experience with Oracle Cloud Infrastructure (OCI) or other cloud platforms (AWS, Azure).

3. Technical Skills:

- In-depth knowledge of Oracle EBS R12 architecture, modules, and workflows.
- Expertise in Oracle Database management, including performance tuning, backup/recovery, and Data Guard.
- Proficiency with Oracle SOA Suite components like BPEL, OSB, and adapters.
- Experience with cloud administration, particularly in Oracle Cloud Infrastructure (OCI), including automation with Terraform or Ansible.
- Strong skills in Linux/Unix environments, shell scripting, and automation tools.

4. Certifications (Preferred):

- Oracle Certified Professional (OCP) - Database Administrator.
- Oracle Cloud Infrastructure (OCI) Certified Architect Associate or Professional.
- Oracle SOA Suite Certified Implementation Specialist.

5. Soft Skills:

- Excellent analytical and problem-solving abilities.
- Strong communication and teamwork skills.
- Ability to manage multiple priorities and work independently.
- Detail-oriented with a commitment to continuous improvement.

6. Work Environment:

- Willingness to provide on-call support and address critical issues during off-hours.

- Flexibility to work on weekends or holidays for major updates or incidents
