Job Description

Join an innovative team as a Software Engineer/Data Engineer, where you will design and implement data solutions to support technological advancements in the Technology & Telecoms industry. This position, based in Tokyo, offers an exciting opportunity to work on cutting-edge projects in a collaborative environment.

Client Details

This organization is a well-established company in the Technology & Telecoms sector. Operating as part of a large organization, it focuses on delivering exceptional technological solutions and services to a diverse range of clients.

Description

- Develop and maintain data pipelines and workflows to support business needs.
- Collaborate with cross-functional teams to design and implement scalable data solutions.
- Optimize data storage and retrieval for improved performance and efficiency.
- Analyze complex datasets to identify trends and provide actionable insights.

- Create and maintain detailed technical documentation for processes and systems.
- Troubleshoot and resolve data-related issues as they arise.

Job Offer

- Opportunity to work on innovative projects in the Technology & Telecoms industry.
- Engaging and collaborative work culture in the heart of Tokyo.
- Flexible temporary position to suit your schedule.
- Chance to enhance your skills with exposure to advanced technologies.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

Required Skills

A successful Software Engineer/Data Engineer should have:

- A strong background in software engineering or data engineering.
 - Proficiency in programming languages such as Python, Java, or SQL.
 - Experience with data integration, ETL processes, and data modeling.
 - Knowledge of cloud platforms and big data technologies.
 - An analytical mindset with a focus on problem-solving and efficiency.
 - The ability to work collaboratively in a team-oriented environment.
