Job Description

【求人No NJB2379744】

Description:

Lead the strategic planning delivery and continuous evolution of scientific publications and presentations for AstraZeneca sponsored regulatory clinical studies and post marketing surveillances in Japan. Drive strategies and guiding principles to maximize the value of publications originating from R D activities to enhance scientific impact external reputation and clinical decision making in Japan. Act as a key scientific partner to R D by leading scientific discussions beyond publication

execution ensuring publications are positioned as strategic scientific assets.

Accountabilities/Responsibilities:

Drive alignment and execution of Japan publication strategies across therapeutic areas in close collaboration with TA teams R D and global stakeholders ensuring consistency with TA level global and R D objectives.

Maximize the scientific and clinical value of R D generated data through optimized publication planning sequencing and scientific positioning for Japanese healthcare professionals and patients.

Lead the simplification standardization and optimization of publication related processes including the identification and implementation of AI and automation solutions to enhance efficiency quality and new ways of working.

Lead and actively contribute to scientific discussions on data interpretation publication scope and scientific messaging serving as a scientific discussion leader within cross functional teams particularly with R D and clinical experts.

Lead and coordinate cross functional publication activities ensuring timely delivery of high quality publications through effective collaboration with investigators and global publication leads.

Ensure compliance with international publication guidelines (e.g. ISMPP GPP) and AstraZeneca Publications Policy promoting ethical transparent and responsible publication practices.

For band E Additional Responsibilities

Oversee publication activities across multiple projects including strategic planning quality governance and complex issue resolution .

Provide coaching mentoring and quality review for junior and band D staff

Required Skills

Requirements:

<Mandatory>

Experience/Knowledge

Several years of experience in medical communications within the pharmaceutical industry or a medical communications agency.

Demonstrated experience in developing publication or scientific communication strategies preferably linked to R D objectives.

Therapeutic knowledge in oncology (drug development clinical research or medical affairs) .

Solid knowledge of the drug development process.

Familiarity with regulations policies standards and SOPs particularly related to the publication process.

Extensive project and budget experience in cross functional collaboration. (mandatory for CL E)

Proven experience in communication and negotiation with global teams. (mandatory for CL E)

<Skills and Capabilities>

Strategic thinking and strong communication skills including the ability to clearly convey scientific and strategic intentions to internal and external stakeholders.

Strong project and stakeholder management skills to drive effective execution of publication activities under complex and resource constrained environments.

Ability to lead scientific level discussions with internal and external experts supported by sound scientific judgment and regulatory awareness.

Change leadership mindset with innovation and creativity including a strong interest in digital transformation AI automation and new ways of working.

English and Japanese skills at Business level

Demonstrated behaviours aligned with AstraZeneca leadership guidelines.

<Nice to Have>

Experience in process improvement operational excellence or digital/AI driven transformation is highly desirable.

Certification as a Medical Publication Professional (CMPP) desired
