Job Description

This position will primarily be responsible to interface with client and internal key stakeholders; apply technical proficiency across different stages of the data project including requirements elicitation, solutioning, AWS architecture and design; play an important role in identifying the appropriate AWS services, seizing the capacity; outlining AWS infrastructure and cost management standards and governance; validating the development process; part of a learning culture, where teamwork and collaboration are encouraged, excellence is rewarded, and diversity is respected and valued.

Your Key Responsibilities

- Advocate client and provide thought leaderships in AWS architecture designing
- Understand the requirements both functional and non-functional to define the holistic view of AWS infrastructure architecture
- Demonstrate compelling business values to the client with AWS architecture/solution aligning to the business scenarios
- Collaborate with the internal stakeholders and outline AWS management standards,

guidelines, governing principles, and policies aligning to the client requirements

- Identify use cases, system & data process flows, outline management approach and define AWS infrastructure
- Specify security, compliance and regulations aligning to the requirements
- AWS reference architecture and framework creation
- Pre-sales activities, proposal creation, solution design and project delivery

Preferred Qualifications

- At least 10 years of experience in AWS architecture areas
- Ability to manage large AWS infrastructure programs, AWS design solution and delivery
- Experience in multiple service on AWS platform.
- Excellent verbal and written communication skills
- Experience in leading teams and managing client expectations
- Experience in software development life cycle. Agile methodology preferred
- Ability to work in team in diverse/ multiple stakeholder environment
- Experience and desire to work in a Global delivery environment

In addition to compensation aligned with your role, you'll have access to a wide range of benefits that support your health, career growth, and overall well-being (JAPAN)

- Term Life Insurance
- Referral Bonus Programs
- Year-End Tax Support
- Paid annual leave and bereavement Leave and Statutory Holidays
- Short Working Hours for employees with caregiving responsibilities.
- Statutory Social Insurance: Welfare Pension, Unemployment Insurance, Health Insurance, Nursing Care Insurance and Worker's Compensation Insurance
- Health & Wellbeing support: Annual Health Checks with partial cost reimbursement, Stress Checks & Industrial Physician support
- Employee Engagement and Wellbeing: Employee Events, Wellbeing Programs, Reward & Recognition
- Workplace Amenities: On-site amenities include complimentary beverages.

Required Skills

Required Qualifications

- Bachelor's degree or foreign equivalent required from an accredited institution. Will also consider three years of progressive experience in the specialty in lieu of every year of education
- At least 15 of experience in Information Technology
- A bilingual resource
- Japan citizens and those authorized to work in Japan are encouraged to apply. We are unable to sponsor at this time
- At least 10 years of experience in AWS infrastructure designing and sizing
