Job Description

Location

Hanoi, Vietnam

Company Overview

A technology-driven organization delivering digital solutions and data-driven services to support business growth and operational excellence.

Job Responsibilities

- Gather, consolidate, and interpret data from various sources such as internal platforms, operational reports, and user-related datasets to support performance assessment and decision-making.
- Design and maintain data dashboards and visual reports using tools like Google Sheets, Looker Studio, Google Colab, or similar platforms.
- Develop and manage recurring reports and structured datasets to serve multiple stakeholders including product, customer support, sales, and engineering teams.
- Monitor data quality throughout the analysis process to ensure reliability, consistency, and completeness.
- Contribute to improving data pipelines and streamlining data handling processes, including automation initiatives to enhance team efficiency.
- Present analytical findings, insights, and improvement suggestions to supervisors or cross-functional teams, with the ability to communicate in Japanese when required.

Job Requirements

- Japanese language proficiency equivalent to JLPT N2 or BJT J2 or higher.
Comfortable working and communicating in a Japanese-speaking professional environment.
- Strong logical thinking skills with a keen interest in numbers, patterns, and data-driven problem solving.
- Detail-oriented mindset with a strong sense of ownership and commitment to data accuracy.
- Eagerness to learn and grow professionally in the fields of Data Analysis or Data Science.
- Good teamwork skills and the ability to collaborate effectively with diverse departments.
- Entry-level candidates or fresh graduates are welcome if they demonstrate strong potential and analytical mindset.
- Prior exposure to data-related roles such as data analysis, business analysis, or reporting/visualization is an advantage.
- Basic hands-on experience with programming languages such as Python or JavaScript is a plus.
- Familiarity with tools and technologies including Excel, Google Sheets, PostgreSQL, or BI platforms like Looker Studio.
- Ability to identify issues from datasets, build reasonable assumptions, and suggest actionable insights.
- Experience with SaaS operations or metrics management (e.g. service health indicators) is highly valued.

Benefits

- Attractive salary and comprehensive benefits package, commensurate with skills and experience.
- Opportunities for professional development and on-the-job learning in a data-centric environment.
- Exposure to international collaboration and Japanese business practices.
Supportive and collaborative workplace culture.
