Job Description

Company and Job Overview

A foreign company specializing in Food & Beverage is looking for Mechanical Process Engineer to join their dynamic team in **Ba Ria - Vung Tau**.

Job Responsibilities

- Responsible for planning, coordinating, and executing the installation of new machines, equipment, and improvement activities for the manufacturing process.
- Supporting new equipment installation projects, managing technical documentation, troubleshooting process-related issues, and implementing improvements to enhance equipment reliability and efficiency.
- Contribute to continuous improvement initiatives, ensure compliance with safety and food industry standards (BRCGS, HSE), and utilize 2D/3D technical drawing software for design and modification tasks.
- Provide ongoing support to identify and resolve process-related deviations impacting product quality or operational performance after project completion.

Job Requirements

- Bachelor's degree in the Mechanical field (Industrial engineering system, Mechanical engineering, Thermal engineering).
- Minimum 2 years of relevant experience in maintenance planning.
- Strong knowledge in 2D/3D technical drawing standard.
- Good communicate in English
- Knowledge of involved areas / maintenance and utilities process / equipment / quality tools.
- Experienced in coordinating and completing machine installation projects while collecting, organizing, and maintaining related technical data (Equipment/Spare parts lists, Technical drawings, P&ID...).
