Job Description

This role focuses on developing and operating front-end services for a large-scale online marketplace used by a broad consumer base. You will contribute across the full development lifecycle while improving performance, quality, and user experience.

Client Details

Our client is a **large multinational e-commerce and digital services group** operating one of Japan's most established online marketplace platforms. The organization is technology-driven, with strong investment in scalable systems that support both consumers and business partners.

Description

- Develop and operate consumer-facing web services using modern front-end technologies (JavaScript, HTML, CSS)
- Participate in system design, development, testing, and release across multiple projects
- Improve front-end performance, quality, and maintainability
- Handle operational tasks including inquiries, investigation, and issue resolution from consumers and merchants
- Collaborate with cross-functional global teams using English as the working language
- Create design documents, test cases, and technical documentation

- Implement and maintain unit and integration tests throughout the development lifecycle

Job Offer

- Weekends and public holidays off
- English-speaking, international engineering environment
- Opportunity to work on a high-traffic, large-scale consumer platform

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serena Wu on +81 3 6627 6137.

Required Skills

Required Skills & Experience

- 3+ years of front-end development experience using JavaScript, HTML, and CSS
- Hands-on experience with React.js and/or Node.js
- Solid understanding of front-end performance optimization
- Working knowledge of web security fundamentals
- Experience in system design and technical documentation
- Experience with unit testing and integration testing
- Business-level English communication skills

Preferred Skills

- Experience using ESLint
 - JavaScript unit testing experience (Jest, Intern, WDIO, etc.)
 - Ability to design front-end architecture
 - Experience in system operations, investigation, and improvement
 - Familiarity with Git
 - Proactive mindset with the ability to identify issues and drive solutions independently
