Job Description

This role leads new feature delivery and platform enhancements for a major e-commerce service used by millions of customers nationwide. You will drive projects from planning through release, ensuring high-quality outcomes and a strong user experience.

Client Details

A leading Japan-based internet services company operating one of the country's largest e-commerce platforms. The successful candidate will join a core technology organisation that supports continuous growth and innovation within a fast-moving digital environment.

Description

- Define project goals, scope, and deliverables with business, product, and technical teams
- Coordinate effective communication across project stakeholders
- Oversee full-cycle execution ensuring schedule, budget, and quality compliance
- Identify risks, propose mitigations, and ensure proactive issue management
- Provide regular project updates, reports, and escalation support
- Manage project budgets and resource planning
- Collaborate with QA teams to secure robust testing and release quality

Job Offer

- Opportunity to directly influence one of Japan's largest e-commerce platforms
- Collaborative, multicultural engineering environment
- Long-term assignment (initial 2-month contract, followed by 3-month renewals)
- Standard working hours: 9:00-17:30, weekends and public holidays off

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Anna Fuji on +81366276095.

Required Skills

- 3+ years as a primary Project Manager in software development
 - Proven leadership of complex or large-scale system development projects
 - Understanding of technologies such as e-commerce platforms, APIs, microservices, CMS, search systems, or payment solutions
 - Strong knowledge of SDLC processes
 - Practical experience with Jira, Advanced Roadmaps, Confluence, and MS Office
 - English: Business level (e.g., TOEIC 800+)
 - Japanese: Conversational
-
