Job Description

We are seeking a Data Engineer to support daily operations within our enterprise Data Warehouse, ensuring the smooth ingestion, validation, and integrity of global portfolio and investment data. This role involves monitoring ETL processes, managing data quality, and collaborating with international teams to enhance data systems and support ongoing data initiatives in a bilingual environment.

Client Details

The hiring organization is a respected player in the Financial Services industry, known for its expertise and commitment to excellence. This large organization provides a professional environment that values innovation and technical proficiency to achieve success in its field.

Description

- Oversee daily data operations within the enterprise Data Warehouse, including ingestion, validation, and maintenance of portfolio and investment datasets.
- Monitor and troubleshoot ETL processes to ensure timely, accurate, and consistent data delivery across global systems.
- Maintain data quality standards by managing exceptions, performing data corrections, and supporting master data

governance.

- Collaborate with global stakeholders to enhance data platforms, support ongoing initiatives, and improve SQL/Python-based processes.

Job Offer

- Competitive yearly salary
- Opportunity to work full remotely (possibility of going into the office 1-2 times monthly), offering flexibility and work-life balance.
- Engage with a large organization in the Financial Services industry based in Tokyo.
- Chance to contribute to innovative technology projects in a professional environment.
- Work in a bilingual setting, enhancing your language and technical skills.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

Required Skills

- Proven experience in data engineering or database operations, with strong SQL skills and a solid understanding of data warehouse environments.
 - Demonstrated ability to manage and maintain high-quality data, including troubleshooting ETL processes and handling data validation issues.
 - Comfortable working in a bilingual, global environment with business-level proficiency in both Japanese and English.
 - Self-motivated, detail-oriented professional with strong analytical skills and the ability to work independently while collaborating effectively with stakeholders.
