Job Description

About the company:

Join a rapidly growing **Gen AI Firm / enterprise AI SaaS Company** building LLM-based tools for businesses such as chat, content generation, workflow automation etc.

About the role:

They are currently hiring an **AI Evaluation Scientist** to lead the design, development, and operation of infrastructure for evaluating the quality of AI agents. This role involves researching and developing evaluation metrics, designing and building automated evaluation pipelines, driving product quality improvements through statistical experimental design, and ensuring the reliability and overall quality of production systems.

You will also be collaborating with various members of the development organization including Research Engineers,

Software Engineers (AI Platform) and Product Managers.

Required Skills

They are looking for candidates who:

- Have a Master's degree in Computer Science, Statistics, Machine Learning or similar fields
- Have more than 3 years of experience as a ML Engineer/ Data Scientist/ Research Engineer or in any ML/AI evaluation related roles
- Are an expert in LLM/ generative AI evaluation methods
- Have knowledge in statistics and experimental design
- Have experience building ML and evaluation pipelines in Python
- Can design custom evaluation metrics

Company Description
