Job Description

Our client is looking to someone who you will design and build scalable backend systems while collaborating closely with global engineering, product, finance, and operations teams. This is a highly autonomous position suited for engineers who enjoy solving complex technical challenges in a modern cloud-native environment.

Responsibilities:

- Design and develop scalable backend systems and services
- Lead projects from architecture through deployment
- Collaborate with cross-functional and global teams
- Build reliable, maintainable, and high-performance systems
- Contribute to modernizing financial infrastructure in Japan

Requirements:

- **Fluent-level Japanese (JLPT N1) or Native Japanese and Business level English**
- **Strong backend development experience with one of the following tech stack; Go, Java, Rust, Kotlin, C#, Scala or C++.**
- Experience with system design and scalable architectures

- Hands-on experience with GCP, PostgreSQL, gRPC, and protobuf
- Ideally experience in working in the financial domain

This role also comes with various benefits, including:

- Fully remote work
- Home office support and monthly allowance
- International engineering environment
- Opportunity to build large-scale financial systems with modern technologies

Company Description
