

## 【800～2500万円】Analog Mixed Signal Design Engineer

外資系半導体メーカーでの募集です。弱電回路設計のご経験のある方は歓迎です。

### Job Information

**Recruiter**

JAC Recruitment Co., Ltd.

**Hiring Company**

外資系半導体メーカー

**Job ID**

1593775

**Industry**

Electronics, Semiconductor

**Company Type**

International Company

**Job Type**

Permanent Full-time

**Location**

Tokyo - 23 Wards

**Salary**

8 million yen ~ 25 million yen

**Work Hours**

09:00 ~ 18:00

**Holidays**

詳細は求人ご紹介時にご案内いたします。

**Refreshed**

June 11th, 2026 18:00

### General Requirements

**Career Level**

Mid Career

**Minimum English Level**

Business Level

**Minimum Japanese Level**

Native

**Minimum Education Level**

Bachelor's Degree

**Visa Status**

Permission to work in Japan required

### Job Description

**【求人No NJB2381333】**

- Design analog and mixed signal circuits meeting architectural requirements and technical specifications
- Contribute to the architectural definition of the design and chip integration
- Perform calculations design and verification simulations to ensure building blocks meet specifications at the schematic level and after post layout extraction while fully provisioning for DFT and DFM
- Work closely with Layout Engineers to validate proper layout using all best known methods
- Document assigned blocks and hold preliminary and final design review meetings

- Actively participate in the chip bring up evaluation and characterization with emphasis on owned blocks
  - Work cross functionally with Product Characterization Test and Application Engineers on issues related to owned circuit blocks
  - Support other projects as needed by management or as business needs change
- 

## Required Skills

### 【Qualifications Requirements】

- M.S. in Electrical Engineering or related field with minimum 15 years of related experience or Ph.D. in Electrical Engineering with minimum 12 years of related experience or Bachelor of Science with minimum 18 years of related experience.
- Excellent academic record with published research projects prototyped and proven in silicon
- Detailed knowledge of CMOS circuits and noise analysis
- Core expertise in one of the following areas:
  - Integer N and fractional N PLL
  - Sigma Delta ADCs
  - Temperature sensor
  - Analog and digital filters
  - Quartz or MEMS oscillator
  - Sub threshold circuits
  - Low noise regulator and bandgap
  - High speed output drivers
- Ability to oversee circuit layout for critical blocks
- Knowledge of programming languages: MATLAB VerilogA
- Proficient in using Cadence analog design tools

### 【Desired Characteristics Attributes】

- Passionate self starter with a strong commitment to flawless execution
  - Excellent written and verbal communication skills required
  - Ability to work well with others in a fast paced collaborative team environment
-
