Job Description

【求人No NJB2370701】
< POSITION SUMMARY >

The Automation and Innovation Senior Analyst will play a key role in supporting the design development and optimization of advanced AI driven automation solutions in warehouse environments. You will work closely with senior architects and cross functional teams to ensure that solutions are scalable efficient and deliver maximum value to operations. This role requires strong technical expertise and the ability to troubleshoot complex systems and contribute to feature development.

< PRINCIPLE DUTIES AND RESPONSIBILITIES >

- Analyze and design innovative AI powered automation solutions for warehouse operations in collaboration with senior architects.
 - Develop and optimize Python based scripts automation tools and interfaces to enhance system performance.
 - Conduct thorough testing and debugging of automation solutions to ensure they meet operational requirements and performance metrics.
 - Assist in integrating AI robotics and computer vision technologies into warehouse management systems.
 - Collaborate with cross functional teams to ensure seamless integration of automation systems across various platforms.
 - Provide technical guidance and mentorship to junior team members.
 - Develop automated monitoring and reporting systems to ensure smooth operation of automation solutions.
 - Assist in documenting system architectures feature requests and technical processes.
-

Required Skills

JOB SPECIFICATIONS FOR SUCCESSFUL PERFORMANCE

■Academic Qualifications:

- Bachelor's or Master's degree in Computer Science Robotics Engineering or related technical fields.

■Experience knowledge:

- 3-5 years of experience in automation robotics AI or related fields.
- Strong programming skills in Python and experience with automation frameworks.
- Experience with AI deep learning and computer vision technologies.
- Hands on experience in integrating APIs and developing scalable automation solutions.
- Knowledge of database solutions (e.g. MongoDB SQLite JSON) and system security protocols.

■Key Competencies:

- Strong problem solving and troubleshooting skills.
 - Ability to work independently and drive technical solutions.
 - Excellent collaboration and communication skills.
 - Passion for innovative technologies and a continuous learning mindset.
-
