Job Description

【求人No NJB2370696】
< POSITION SUMMARY >

We are looking for an eager and highly motivated Automation and Innovation Analyst to assist in the development and integration of cutting edge AI powered warehouse automation solutions. This entry level role is designed for individuals who are passionate about emerging technologies like AI robotics and automation and want to gain hands on experience in optimizing warehouse operations. You will collaborate with senior team members to support automation projects from idealization to implementation.

< PRINCIPLE DUTIES AND RESPONSIBILITIES >

- Assist in gathering and analyzing user requirements for automation solutions in warehouse environments.
 - Contribute to the development of AI driven automation systems including robotics deep learning and computer vision technologies.
 - Support the creation of data pipelines and automation tools using Python and other relevant technologies.
 - Conduct basic testing and troubleshooting to ensure the systems meet functional requirements and performance standards.
 - Collaborate with cross functional teams to integrate automation solutions into existing workflows and processes.
 - Assist in the development of user facing web interfaces and APIs to interact with backend systems.
 - Contribute to the documentation of technical processes and system configurations.
 - Participate in maintaining and optimizing existing automation solutions to improve system efficiency.
-

Required Skills

JOB SPECIFICATIONS FOR SUCCESSFUL PERFORMANCE

■Academic Qualifications:

- Bachelor's degree in Computer Science Engineering Robotics or a related field.

■Experience knowledge:

- Basic knowledge of Python and familiarity with basic programming concepts.
- Exposure to AI machine learning robotics or automation technologies.
- Strong interest in logistics and supply chain management systems.
- Excellent problem solving and analytical skills.
- Ability to work well within a team and learn quickly in a dynamic environment.

■Key Competencies:

- Strong attention to detail and organizational skills.
 - Excellent written and verbal communication abilities.
 - Strong desire to learn and grow in the field of automation and innovation.
