Japan-based candidates only. no visa sponsorship available.

An American multinational investment bank and financial services company with a global presence is seeking a **Java Developer** (SQL, Linux)

Responsibilities:

- Designing, developing and maintaining Java-based applications
- Taking ownership of delivery of the initiatives across the full software development lifecycle
- Working on a project onboarding and integrating within an internal platform into the firm's environment
- As well as developing code from scratch also help with testing, code reviews, design and support
- Working within the old legacy technical stack and utilizing some new technology to the environment like Kafka and Kubernetes

Why should you apply:

- Unique chance to kick start a career in finance in one of the worlds most prestigious banks
- Gain experience working closely with highly skilled & talented co-workers in globally distributed teams across Tokyo, Bengaluru, London, New York
- High flexibility in remuneration (Salary is negotiable based on candidate's experiences)

Required Skills

- 2-4 years Java Development
- Able to perform strong hands on coding and logic, without AI tool assistance
- Hands on skills/experience with SQL
- Comfortable in Linux environments
- Relevant work experience in a team-focused environment
- Strong object-oriented design and programming skills and experience in OO languages (Java)
- Ability to work independently and as a team
- Ability to interface with users for testing, verification, completion.
- Strong work ethic
- Well-developed analytical skills
- Well-developed communication skills
- Proactive in sharing updates and initiating escalations.
- English: Business level (Read, write, speak) / Japanese: Not needed (nice to have)
