Job Description

Seeking a Senior Frontend Engineer to design, build, and maintain consumer-facing web applications using modern technologies like JavaScript and React. The role covers end-to-end development, performance optimization, system operations, and proactive problem-solving in an English-speaking environment.

Client Details

This opportunity is with a prominent organization in the retail industry. The company is a large organization that focuses on leveraging cutting-edge technology to provide exceptional customer experiences. It is known for its commitment to innovation and continuous improvement in its services.

Description

- Lead frontend system design and develop high-quality consumer-facing web applications using JavaScript, HTML, CSS, and frameworks such as React.js and Node.js.
- Own the full development lifecycle including design, implementation, testing (unit/integration), and release across

multiple projects.

- Monitor, troubleshoot, and enhance live systems, including handling inquiries, investigating issues, and performing operational improvements.
- Drive performance optimization, ensure web security best practices, and proactively identify problems while leading solutions in an English-speaking environment.

Job Offer

- Complimentary meals provided at the cafeteria.
- Opportunities to grow your skills in a large organization within the retail industry.
- One day work from home

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

Required Skills

A successful Frontend Engineer should have:

- A strong foundation in HTML, CSS, and JavaScript.
 - Experience working with modern frontend frameworks such as React, Angular, or Vue.js.
 - Familiarity with version control systems like Git.
 - An eye for design and attention to detail in user interface development.
 - Basic understanding of backend technologies and APIs.
-
