Job Description

In today's digital landscape, businesses must be secure, resilient, scalable, and above all—connected. Our client provides flexible and cost-effective colocation and IT infrastructure solutions that enable organizations to plan for growth with confidence and future-ready data center strategies.

Operating multiple state-of-the-art data centers across Europe and APAC, our client delivers high levels of security, connectivity, and local support. With a rapidly expanding footprint, the organization continues to invest in infrastructure and real estate to support new site development and expansion initiatives.

This is an exciting opportunity to join a dynamic, forward-thinking team during a period of significant growth and transformation.

Role Overview

Reporting to the IT Architecture Manager, this role is responsible for the design, deployment, and support of business-critical IT infrastructure across the region.

Key Responsibilities

- Day to day support for physical and virtual server infrastructure (configuration, patching, troubleshooting).
- Provide 2nd/3rd line support for IT infrastructure
- Lead infrastructure projects and BAU activities
- Manage and develop technical team members
- Act as a regional escalation point and subject matter expert
- Support incident, problem, and change management processes
- Contribute to infrastructure design and implementation
- Manage vendors and third-party service providers
- Maintain technical documentation and standards
- Evaluate and introduce new technologies

Required Skills

Essential:

- Experience with Azure public cloud environment
- Scripting and automation (PowerShell, VBScript)
- Experience managing VMware vSphere / ESX environment
- Networking knowledge (L2/L3 switching, firewalls, wireless)
- Experience managing Windows infrastructure (Active Directory, DHCP, DNS)
- Strong understanding and implementation of IT security best practice

Desirable:

- Business Level Japanese language skills (presentation, reading and writing)
- Experience with enterprise databases (SQL Server, Azure SQL Database)
- Microsoft 365 / Azure AD administration
- Previous team leadership or IT management experience
- IT project management experience
- Vendor management experience

*****Applicants must presently be residing in Japan. Applicants from outside Japan need not apply and will not be contacted.**
