Job Description

Join a growing mobile team building a high-impact personal finance application within a large digital services ecosystem. You will lead core design decisions, develop robust iOS features, and drive quality through modern engineering practices.

Client Details

A leading, large-scale internet services group in Japan offering diverse consumer platforms across media, finance, and lifestyle domains. Their mobile teams build user-focused applications that integrate into a broad digital ecosystem with millions of users.

Description

- Design and build advanced iOS applications using Swift
- Lead basic design (high-level design) efforts and guide implementation decisions
- Collaborate with cross-functional teams (product, backend, design) to define, design, and ship new features
- Implement and maintain applications using MVVM architecture
- Integrate applications with RESTful APIs and external data sources
- Write and maintain unit tests to ensure code reliability and performance
- Identify and resolve bugs while improving application performance and responsiveness

- Participate in code reviews and contribute to engineering best practices
- Engage in the full development lifecycle: requirements, design, coding, testing, and deployment
- Work within an Agile/Scrum environment to deliver high-quality releases

Job Offer

- Opportunity to lead core design in a high-visibility mobile product
- Collaborative, international engineering environment
- Exposure to both iOS and potential Android development initiatives
- Office-based role in Tokyo with a structured Agile setup

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serena Wu on +81 3 6627 6137.

Required Skills

- Bachelor's degree in Computer Science, Engineering, or related field
- 6+ years of software development experience, including 4+ years in Swift
- Proven experience delivering iOS applications (at least one published app)
- Strong knowledge of iOS SDK, RESTful APIs, and JSON integration
- Hands-on experience with MVVM architecture
- Experience with CocoaPods and/or Swift Package Manager
- Proficiency with Git-based version control (GitHub, GitLab, Bitbucket)
- Experience writing unit tests and working with testing frameworks
- Familiarity with CI/CD pipelines and tools
- Strong understanding of the full mobile development lifecycle
- Business-level English (e.g., TOEIC 800+)

Preferred Skills

- Experience with push notifications and cloud messaging APIs
 - Knowledge of Apple's design principles and UI guidelines
 - Strong problem-solving skills and attention to detail
 - Ability to work in a multinational team and manage multiple tasks
 - Japanese reading ability
-
