Job Description

Seeking an application engineer to lead end-to-end development, including requirements analysis, system design, implementation, testing, and deployment of scalable ad platform solutions. The role requires strong full-stack expertise, collaboration with cross-functional global teams, and a proactive mindset to drive technical improvements and adopt emerging technologies such as AI.

Client Details

The employer is a large organization operating in the Technology & Telecoms industry. Known for its commitment to innovation, the company offers an environment where technical expertise is highly valued.

Description

- Gather and analyze business requirements, translate them into technical specifications, and design scalable system architectures.
- Develop, implement, and maintain applications using Java (Spring Boot/Batch), databases, and cloud/big data

technologies.

- Conduct code reviews, ensure code quality standards, perform testing, and manage deployment and post-release monitoring.
- Collaborate with cross-functional and global teams to drive continuous improvements, optimize systems, and adopt emerging technologies including AI tools.

Job Offer

- Complimentary meals provided at the company cafeteria.
- Opportunities to work on exciting projects in the Technology & Telecoms industry.
- Collaborative work culture in a large organization based in Tokyo.
- 1 day work from home, hybrid option

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

Required Skills

- 5+ years of hands-on software development experience with strong skills in system design, coding, and problem-solving.
 - Proficient in Java (Spring Boot/Batch), databases (MySQL, MongoDB), and modern development tools and frameworks.
 - Experienced in Agile/Scrum environments with a proactive, self-driven mindset and strong ownership of tasks.
 - Effective communicator and team player, capable of collaborating with cross-functional and multicultural teams while adapting to new technologies including AI tools.
-
