### Job Description

**Key Responsibilities**

- Design, develop, and maintain high-performance applications on **Linux and Windows** platforms.
- Develop robust and scalable desktop applications using **C# and WPF**.
- Implement and manage **communication protocols**, including **Socket Programming** and **Inter-Process Communication (IPC)**.
- Collaborate with clients and stakeholders to gather requirements and translate them into technical specifications.
- Debug, troubleshoot, and optimize application and system performance.
- Ensure adherence to coding standards, SDLC processes, and best practices.
- Work closely with cross-functional teams to ensure timely delivery.
- Participate in Agile/Scrum activities such as sprint planning and reviews.
- Provide technical guidance and support to team members when required.

### Required Skills

- **3+ years** of hands-on experience in software development.
- Strong experience in **C# and WPF** for desktop application development.
- Solid experience working on **Linux and Windows** operating systems.

- Strong knowledge of **Socket Programming** and **Inter-Process Communication (IPC)**.
- Good understanding of system-level programming, multi-threading, and networking concepts.
- Experience with debugging, performance tuning, and troubleshooting applications.
- Familiarity with version control systems such as Git.
- Solid understanding of SDLC and Agile methodologies.
- Strong problem-solving and analytical skills.
- Good English communication skills.
- Experience in client-facing roles is an advantage.
- JLPT N3 and Above
