#### Job Description

**Position Summary**

In this role, you will drive end-to-end project execution-from upstream planning to downstream implementation-for new initiatives and improvements related to payment, charging, and dunning processes within the company's consumer services. This position offers the opportunity to lead high-impact projects, collaborate with cross-functional teams across Japan and overseas, and help shape the next generation of their financial and billing systems.

**Key Responsibilities**

- Lead and manage full project lifecycles, including scheduling, stakeholder alignment, and progress tracking.
- Clarify business requirements, determine project direction, and bridge communication between business units and engineering teams.
- Act as the primary point of contact for internal and external stakeholders-both domestic and international-ensuring smooth communication and negotiation.
- Oversee production release activities, including night-time testing.
- Manage incident response and problem resolution in urgent or unexpected situations (including weekends/holidays/night shifts when required).
- Contribute to master data management related to products, plans, and pricing for payment and billing systems.
- Collaborate closely with development teams on technical validation, feasibility checks, and execution planning.

**Required Qualifications**

Candidates must meet the following essential criteria:

**Project & Business Leadership**

- 5+ years of professional experience, with preference for those with 7+ years.
- 3+ years of hands-on project management experience, including managing multiple projects concurrently.
- Proven ability to work closely with both business units and engineering teams.
- Experience defining requirements, giving clear direction, and collaborating in detail with engineers.
- Knowledge or experience in software engineering or system development environments (**Knowledge on Linux and/or Unix is a must**).
- Experience with JIRA and Confluence.
- Understanding of infrastructure environments.

**Communication Requirements**

- Business to Native-level Japanese proficiency.
- Business-level English
- Strong logical communication and adaptability when working with domestic and international stakeholders.
