Job Description

We are looking for a skilled Java Developer to design, build, and maintain scalable applications while collaborating with global teams in an English-speaking environment. The role requires strong technical expertise in Java and excellent communication skills to work effectively with international stakeholders.

Client Details

Our client is a well-established large organization within the financial services industry. They are known for their commitment to leveraging advanced technology to drive business success and deliver exceptional services to their clients.

Description

- Develop, enhance, and maintain high-performance Java applications using modern frameworks such as Spring Boot
- Collaborate with global stakeholders and cross-functional teams in English to gather requirements and deliver solutions
- Write clean, efficient, and well-documented code while participating in code reviews and technical discussions
- Troubleshoot issues, optimize system performance, and support ongoing improvements in a fast-paced environment

Job Offer

- Opportunity to work with a reputable large organization in the financial services industry.
- Collaborative and technology-driven work environment.
- English based opportunity

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

Required Skills

- Proven experience in Java development with strong knowledge of object-oriented programming and modern frameworks (e.g., Spring Boot)
 - Business-level English communication skills, with the ability to collaborate effectively in a global team environment
 - Strong problem-solving abilities with a proactive, detail-oriented mindset
 - Experience working in Agile environments and the ability to adapt in a fast-paced, dynamic setting
-
