Job Description

A full-stack application engineer with 7+ years of experience designing, building, and maintaining scalable systems while translating business needs into technical solutions. Requires strong expertise in Java or Python, DevOps practices, and cloud platforms (Azure, AWS, or GCP), with the ability to work in agile, cross-functional teams.

Client Details

A leading global internet services company with a diverse ecosystem spanning e-commerce, digital advertising, fintech, and telecommunications. Known for its innovation-driven culture, it leverages advanced technology and data to deliver integrated solutions and drive growth across multiple business domains.

Description

- Design, develop, and maintain scalable applications, converting business requirements into technical solutions across the full development lifecycle
- Implement high-quality code using Java or Python, with strong focus on system design, testing, code review, and

- performance optimization
- Manage deployments, CI/CD processes, and production monitoring while collaborating closely with DevOps and cross-functional teams
- Continuously improve systems by leveraging modern technologies, data platforms, and automation while contributing to agile, global project delivery

Job Offer

- Complimentary meals provided at the on-site cafeteria.
- Opportunity to work with cutting-edge technology in the Technology & Telecoms industry.
