Job Description

Lead the design, development, and operation of high-traffic web backend systems, making key architectural decisions and ensuring scalability, reliability, and high performance. Manage projects and technical teams while delivering features end-to-end-from requirements prioritization to release and production support.

Client Details

This opportunity is with a well-established large organization in the retail industry. The company is recognized for its innovative approaches and its commitment to delivering exceptional products and services to its customers.

Description

- Lead end-to-end backend development for large-scale web systems, including architecture design, implementation, testing, and release.
- Drive technical decisions and project execution while managing priorities, timelines, and cross-functional collaboration.

- Ensure system scalability, performance, and stability, especially under high-traffic conditions, with continuous optimization.
- Oversee operations such as monitoring, troubleshooting, and handling inquiries to maintain reliable production services.

Job Offer

- Complimentary meals at the cafeteria.
- Opportunity to work in a large organization within the retail industry.
- Hybrid work mode (1 day work from home)

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

Required Skills

- 5+ years of experience as a Tech Lead, with strong expertise in designing architecture for high-traffic web systems and making sound technical decisions.
 - Proven ability to lead scalable and maintainable system design while guiding long-term service growth and feature integration.
 - Solid hands-on experience in Java/Spring Boot development, REST API design, relational databases, and modern DevOps tools (CI/CD, containers).
 - Strong problem-solving skills with experience in production monitoring, troubleshooting, and effective communication in English within global teams.
