### Job Description

We are looking for a Data & AI Engineer who enjoys building data solutions and exploring machine learning and AI technologies. This role is ideal for someone who wants to strengthen both data engineering and AI skills while working on real business use cases in a collaborative environment.

### Responsibilities

- Develop and maintain data pipelines and ETL processes to ensure reliable data flow
- Build and deploy machine learning or AI models to support business insights and applications
- Work closely with cross-functional teams to understand requirements and deliver data-driven solutions
- Ensure data quality, consistency, and proper handling across systems
- Keep up with emerging tools and technologies in data, AI, and cloud environments

#### Qualifications

- Bachelor's degree in Computer Science, Data, or a related field
- 4+ years of relevant experience
- Solid skills in Python and SQL, with experience in data processing tools or platforms
- Familiar with cloud services (e.g., AWS, Azure, or GCP) and basic deployment practices
- Understanding of machine learning concepts; experience with AI or GenAI tools is a plus
- Good problem-solving ability, willingness to learn, and able to work well in a team environment
