Job Description

Responsibilities

- Manage daily injection molding operations to meet targets in quality, output, cost, and delivery.
- Plan and control production schedules to match customer demand and deadlines.
- Lead production teams (supervisors, technicians, operators) to ensure smooth and efficient operations.
- Work with the Quality team to ensure products meet standards and handle issues effectively.
- Review production performance and take action to improve efficiency and reduce downtime.
- Adjust machine settings, processes, and mold setups to improve productivity and reduce defects.
- Coordinate with Engineering and Tooling teams to ensure machines and molds are ready for production.

- Support team development, ensure safety compliance, and report performance with clear improvement plans.

Qualifications

- Bachelor's degree in Engineering or a related field.
- 5–8 years of experience in plastic injection molding, with leadership or supervisory exposure.
- Strong knowledge of injection processes, machines, materials, and basic mold troubleshooting.
- Good analytical skills with the ability to solve problems and improve production performance using data.
- Strong leadership, communication skills, and ability to work under pressure in a fast-paced environment, with good command of English.
