## Job Description

Position: Transformer Management (Design, Production and QA)

Salary: 60,000 – 80,000 THB

Location: Bang Bo, Samut Prakan

### Key Responsibilities:

- Design, install, and commission transformers, switchgear, and power generators.
- Perform testing, troubleshooting, and maintenance of electrical equipment in power plants.
- Analyze electrical system performance, load flow, and fault conditions.

- Strong understanding of high-voltage equipment (HV/MV systems).
- Knowledge of transformer operations, protection systems, and cooling methods.
- Familiarity with switchgear operations, protection relays, and circuit breakers.
- Basic understanding of power generation systems (thermal, gas, or renewable plants).
- Ability to read and interpret single-line diagrams (SLD) and electrical schematics.
- Use of tools/software for power system analysis or protection coordination.
- Conduct root cause analysis and implement corrective actions.

Qualifications:

- Bachelor's degree in electrical engineering / Power Engineering or equivalent
- Strong background in power systems, high-voltage engineering, and protection systems
- Understanding of transformers, switchgear, circuit breakers, and generators
- Knowledge of IEC, IEEE, or ANSI standards
- Ability to read and work with electrical drawings (SLD, wiring diagrams)
