Job Description

Company Overview

A company in the document solutions and business technology industry is hiring for a Bridge Software Engineer (Japanese, UI-UX, Onsite) position.

Job Description

- Analyze and understand requirements from the Japan team, and support the Vietnam development team in requirement clarification, explanation, and Q&A handling.
- Coordinate communication between teams in Vietnam and Japan to ensure smooth project execution and effective collaboration.
- Monitor project progress and provide timely updates and reports to stakeholders.

- Perform testing activities in relevant development and operational environments.
- Investigate issues, identify root causes, and coordinate with appropriate teams to resolve problems efficiently.
- Support the development and maintenance of software related to multifunction devices and associated solutions.
- Be prepared to work and collaborate with overseas teams, including potential long-term assignments in Japan when required.

Qualifications

- Bachelor's degree in Computer Science, Information Technology, or a related field, or equivalent practical experience.
- Minimum 3 years of experience as a Bridge Software Engineer or in a similar role involving coordination between offshore and onsite teams.
- Experience working in a Japanese business environment or collaborating with Japanese clients or projects is highly preferred.
- Japanese language proficiency at N2 level or above.
- Intermediate English communication skills, including speaking, listening, reading, and writing.
- Strong communication, coordination, and stakeholder management skills.
- High level of ownership, accountability, and proactive problem-solving ability.
- Willingness and ability to work long-term in Japan when required.
- Basic knowledge of JavaScript or C++ is advantageous.
- Relevant technical certifications are a plus.
