### Job Description

#### Company Overview

A company in the IT services industry is hiring for a Senior EAI Developer position. The organization delivers advanced system integration solutions for enterprise clients, focusing on connecting complex business applications and improving operational efficiency.

#### Job Description

- Design and develop data integration flows to connect on-premise and cloud-based systems, enabling seamless data exchange across enterprise platforms
- Build and implement automated data pipelines between systems such as ERP, cloud storage, and other business applications to reduce manual processes
- Define data mapping and transformation logic across multiple data sources and formats including XML, JSON, CSV, and Excel

- Monitor, troubleshoot, and optimize existing integration processes to ensure performance and reliability
- Collaborate with business analysts and stakeholders to translate functional needs into technical integration solutions
- Maintain detailed technical documentation covering integration design, data structures, and API configurations

Requirement:

Must have:

- Technical Expertise: Minimum 5 years of hands-on experience developing with ASTERIA Warp or similar technologies e.g. Snowflake.
- Integration Knowledge: Proven experience with EAI/ESB concepts, including REST/SOAP APIs, FTP/SFTP, and SQL databases
- Data Formats: Proficiency in handling XML, JSON, CSV, and Excel data structures within a no-code/low-code environment
- Employee will work on-site Tokyo

Good to Have:

- Experience with other Asteria products like Gravio (Node computing) or Platio (App development)
- Knowledge of cloud platforms (AWS, Azure, or Google Cloud)
- Background in Japanese ERP systems (e.g., Biz!, OBIC7)

Language Skill

- English – Not mandatory. Good to have English speaking skill.
- Japanese – Native or JLPT N1 equivalent level

Employee: Open for candidates on the world, exclusion Japanese

Prefer: Permanent Resident Visa or employee in Japan
