Job Description

Company Overview

A company in the IT services industry is hiring for a Full Stack Web Developer (Spring Boot / Angular) position.

Location: Tokyo

Job Description

- Design and develop scalable backend services using Spring Boot.
- Build responsive and high-performance Single Page Applications (SPA) using Angular.
- Develop and integrate RESTful APIs to support application functionality and system integration.

- Collaborate closely with product, UX, and DevOps teams to deliver high-quality solutions.
- Enhance existing features, troubleshoot issues, debug applications, and optimize overall system performance.
- Participate in system architecture discussions and contribute to technical design decisions.

Qualifications

- Minimum 6 years of hands-on experience in web development.
- Strong experience with Java and Spring Boot.
- Hands-on experience developing applications with Angular.
- Experience building Single Page Applications (SPA) from the ground up.
- Experience designing and developing RESTful APIs.
- Solid knowledge of HTML, CSS, TypeScript, and JavaScript.
- Good communication and documentation skills.
- Knowledge and development experience related to billing systems in Japan.
- Native-level Japanese proficiency or JLPT N1 equivalent.
- Experience with AWS services, particularly SQS, Step Functions, and ECS, is an advantage.
- Experience with cloud-native services is preferred.
- Familiarity with CI/CD pipelines is beneficial.
- Knowledge of Docker and containerization technologies is a plus.
- Exposure to event-driven architecture is advantageous.
- Experience in performance tuning and application monitoring is preferred.
- Understanding of authentication and authorization concepts such as JWT and OAuth is beneficial.
- Knowledge of billing systems and financial calculation logic is an advantage.
