Job Description

Company Overview

The company is a worldwide leader in wireless broadband solutions

Job Responsibilities

- Develop and maintain software features using C/C++ on Embedded Linux systems
- Troubleshoot and resolve software issues throughout the development lifecycle
- Analyze system logs and perform root cause analysis for technical problems
- Validate software functionality on hardware platforms
- Participate in code reviews and collaborate with cross-functional teams

- Support product release activities and contribute to software quality improvements

Job Requirements

- Bachelor's or Master's degree in Computer Science, Electrical Engineering, or related field
- 1+ years of experience in Embedded Linux software development
- Strong programming skills in C/C++
- Experience working in Linux environments, including shell scripting
- Familiarity with build systems, cross-compiling, and software porting
- Good English communication skills
- Experience in networking, telecom, or IoT domains
- Familiarity with devices such as routers, access points, gateways, or similar networking products

Benefit

- Competitive salary with performance-based bonuses and annual review
- Additional yearly bonus based on performance
- Health insurance coverage
- Flexible working environment with work-life balance
- Opportunity to work on advanced embedded and networking technologies
- Collaborative and supportive team environment

Due to the high volume of applicants, we regret to inform that only shortlisted candidates will be notified. Thank you for your understanding.
