### Job Description

Our client is a leading US company, provider of innovative, high-productivity ion implantation solutions for the semiconductor industry. They specialize in manufacturing and servicing capital equipment and is currently looking for an engaging Field Service Engineer talent to be part of their expanding team in the Northern region.

**JOB RESPONSIBILITIES**

- Travel to customers' locations or be assigned to an individual customer site
- Responsible for on-site installations, startup, diagnosis, service and repair of company equipment
- Assist customers by selling and installing equipment modifications, upgrades and service contracts that enhance the operation of Company' products
- Coordinate and perform on-site installation and repair of complex company equipment with minimal supervision
- Troubleshoot and repair complex electronic, computer, robotics and mechanical subsystems
- Interface with technical support, design engineering, and manufacturing engineering on tooling, preventive

maintenance procedures, design, and reliability

- Work from engineering drawings, schematics, and technical manuals during the installation, debugging, and repair of equipment
- Complete standard documentation, procedures and forms, and comply with ISO related procedures and processes

**JOB REQUIREMENTS**

- Degree in Engineering (Electronics & Electrical Engineering, Mechanical, Mechatronics)
- Able to work independently
- Eager to learn new things and have strong self-discipline
- Own a transport and must be willing to travel
- This role is based in Kulim.
