Job Description

COMPANY OVERVIEW

Our Client is a well-established manufacturing company specializing in the production of high durability and food-grade packaging solutions for broad range of industries, primarily food products, chemical, animal feeds etc. The organization is dedicated to maintaining high operational standards, product quality, and compliance with established safety and regulatory frameworks.

JOB RESPONSIBILITIES

- Plan and carry out preventive and corrective maintenance activities to ensure smooth operation of machinery and facilities
- Diagnose equipment issues, perform repairs, and provide effective technical solutions to minimize downtime

- Analyze equipment failures, identify root causes, and implement corrective and preventive measures
- Manage spare parts procurement and maintain accurate inventory control to support maintenance activities
- Support operation and maintenance of the wastewater treatment plant.
- Support maintenance-related projects in collaboration with internal stakeholders
- Update maintenance documentation and ensure implementation in accordance to ISO 9001 and ISO 22000 requirements.

JOB REQUIREMENTS

- Diploma or Bachelor's Degree in Engineering, or a related field
- Preferably with at least 2 years of experience as Maintenance Engineer in Manufacturing industry, exposure to food process / food packaging would be added advantage.
- Strong analytical and problem-solving skills on preventive maintenance systems as well as equipment breakdown troubleshooting,

Interested candidates are welcomed to apply online.
