Job Description

Our client, Construction Based Company, looking for suitable candidates

JOB RESPONSIBILITIES

- Carry out structural analysis and design of buildings using ETABS, RAM Concept, and other engineering tools.
- Design reinforced concrete, post-tensioned slabs, structural steel, and load-bearing elements to comply with AS codes.
- Design of temporary works including formwork, propping, and scaffolding structures.
Prepare design reports, design briefs, and detailed structural calculations for submission and review.
- Ensure the structural integrity, buildability, and cost-effectiveness of all design solutions.

JOB REQUIREMENTS

- Approximately 8 years of structural engineering experience, preferably within a consulting or contractor design environment.
- Proven experience working on Australian commercial, residential, or infrastructure projects.
Advanced proficiency in ETABS and RAM Concept.
Strong understanding of reinforced concrete, post-tensioned systems, and structural steel design
