Job Description

Our client is a global semiconductor manufacturer specializing in embedded processing, analog, connectivity, and power solutions. They offer semiconductor products, including actuators, sensors, amplifiers, data converters, and other related components. Join them and be a part of an ever-growing team.

Job Descriptions

- Ensuring the long-term quality, reliability, and manufacturability of our power IC products.
- Oversees high volume PCP Products mass production manufacturing across all internal factory and subcons.
- Sustaining Product COGS improvement and process optimization such as Yield/Volume/Test Time/failure improvements. Improve Test process and prevent potential quality excursions.
- Manage and mitigate risk in PCRb (Process Change Review Board) to keep delivery by supporting product qualifications, second-source/material changes, and process migrations/improvements.

- Analyze product performance, failure modes, and reliability to support customer returns (RMA/FA).

Job Requirements

- At least have a minimum of 3 years' experience in Product Engineering.
- Bachelor's Degree Engineering in Electrical/Electronic, Physics, Computer or related fields
- Proficient in Data manipulation and analysis skill. Familiar with JMP, PDF Exenso is a plus.
- Product Management skill. Strong sense of Cost, ROI and efficiency
- Familiar with Integrated Circuit semiconductor process
