### Job Description

Our client is an established EMS company, emerging as a market leader in the design and manufacturing of IoT and home automation products. They are now seeking talented individuals with an innovative mindset to join their ever-growing Engineering team.

### Job Responsibilities

- Implement and evaluate proposed designs and processes for manufacturability.
- Establish robust, repeatable and reproducible process parameters.
- Trouble shoot process related issues.
- Participate to activities pertaining to cycle time and process improvements.
- Implement statistical process analysis on new and existing products.

- Implement safety, productivity and yield improvements.
- Provide continuous development of manufacturing techniques that will improve inhouse capabilities.
- Interface with production of all activities associated with new process implementation and transfer.
- Assist in the development of training and provide training to production personnel during new technology transfer
- Responsible for all SMT, Auto insert, Manual Insert, Washline and Xray

#### **Job Requirements**

- Min Bachelor's Degree in Engineering of relevant course.
- Excellent technical skills with systematic problem-solving approach
- Knowledgeable with Lean Manufacturing.
- Independent performer with ability to work under minimal supervision.
